
Portfolio Pack

Employer-readable simulation outputs prepared for review and portfolio use.

Session ID: module-2-1-walkthrough

Exported: 2026-03-20T14:32:29Z

Simulation draft prepared with AI assistance; review before external sharing.

Final Plan

Module 2.1 first-pass design plan

Status: Draft | Created: 2026-03-20T14:32:29Z

Simulation draft prepared with AI assistance; review before external sharing.

Problem Statement

Design a Gucci Group leadership model that creates enough consistency for talent decisions across the Group while preserving the autonomy and identity of individual brands.

CEO Lens

- Shared leadership expectations should support Group strategy over the next 3 to 5 years.
- The Group needs common leadership principles without erasing brand-specific leadership expression.

CHRO Lens

- Group HR needs a model that can be used for recruitment, appraisal, development, succession, and mobility.
- The framework should translate Vision, Entrepreneurship, Passion, and Trust into observable behaviors.

First-Pass Competency Model

Vision

- Sets direction linked to brand and Group ambition.
- Makes long-term priorities clear.

Entrepreneurship

- Acts with initiative and ownership.
- Sees opportunity and moves with discipline.

Passion

- Models energy, standards, and commitment.
- Inspires follow-through and pride in execution.

Trust

- Builds credibility through clarity, consistency, and respect.
- Creates conditions for collaboration across brands and functions.

Level Logic

- Senior leaders define direction and shape Group alignment.

-
- Mid-level leaders translate themes into team choices and development.
 - Emerging leaders demonstrate the behaviors consistently in day-to-day execution.

Priority Use Cases

- Recruitment
- Appraisal
- Development
- Mobility

Open Questions

- Which behaviors must be global versus locally adapted?
- What evidence should be used for level-based assessment?

Source Notes

- CEO context (Scenario starter)
- CHRO working knowledge (CHRO Knowledge.md)
- Assignment mission (Simulation design brief)
- Module 2.1 Steps 2 to 5 working design capture

Internal Communications

Simulation draft prepared with AI assistance; review before external sharing.

Module 2.1 stakeholder workshop summary

Type: Workshop Summary | Status: Draft | Created: 2026-03-20T14:32:29Z

Audience: HR and brand stakeholders

Workshop Summary

The session aligned on the leadership challenge Gucci Group is solving and established a first-pass Group DNA built around Vision, Entrepreneurship, Passion, and Trust.

What Was Aligned

- The model should support Group consistency without removing brand autonomy.
- The first uses should be recruitment, appraisal, development, and mobility.
- The next design step is to turn the four themes into level-based behavior indicators.

What Happens Next

- HR will refine behavior examples by level.
- Leadership will review the first-pass model and remaining design choices.
- The competency matrix and CEO pack will be drafted from this output.

Source Notes: CEO context (Scenario starter); Cross-functional rollout scenario (Scenario starter); Supervisor agent requirement (Simulation design brief); Module 2.1 Step 5 internal communication capture

Executive Update

Module 2.1 executive decision update

Status: Draft | Created: 2026-03-20T14:32:29Z

Simulation draft prepared with AI assistance; review before external sharing.

Executive Summary

Module 2.1 established the case for a Gucci Group leadership DNA and produced a first-pass structure anchored in Vision, Entrepreneurship, Passion, and Trust.

Decisions Reached

- A Group leadership model is needed to support mobility, pipeline strength, and talent consistency.
- Brand autonomy remains a design constraint, not something to remove.
- The model will first be applied to recruitment, appraisal, development, and mobility.

Leadership Decisions Still Needed

- Confirm which expectations are mandatory across all brands.
- Confirm the level architecture for the competency matrix.
- Confirm sponsorship for the next draft and CEO pack.

Source Notes

- CEO context (Scenario starter)
- In-simulation tools and guardrails (Simulation design brief)
- Cross-functional rollout scenario (Scenario starter)
- Module 2.1 Step 6 executive refresh

Sources And Notes

Each section below records the sources or notes attached during export.

Module 2.1 first-pass design plan

- CEO context (Scenario starter)
- CHRO working knowledge (CHRO Knowledge.md)
- Assignment mission (Simulation design brief)
- Module 2.1 Steps 2 to 5 working design capture

Module 2.1 stakeholder workshop summary

- CEO context (Scenario starter)
- Cross-functional rollout scenario (Scenario starter)
- Supervisor agent requirement (Simulation design brief)
- Module 2.1 Step 5 internal communication capture

Module 2.1 executive decision update

- CEO context (Scenario starter)
- In-simulation tools and guardrails (Simulation design brief)
- Cross-functional rollout scenario (Scenario starter)
- Module 2.1 Step 6 executive refresh
